

# Demonstration ATM Web Host

The document describes how to start ATM Web Host demo stand. It includes basic scenarios illustrating how to use expanded ATM capabilities:

1. ATM cash withdrawal
2. Payment for a service in cash or by bank card
3. Authorization in personal area via login and password and access the client information
4. Emulation of an abnormal situation. For example, connection failure with processing, printer fault and etc.

## Demo stand. Common information

We recommend that you use Internet Explorer, because we haven't tested the demo-stand with other browsers. **Before starting the demo stand, please clean the browser's cache (delete temporary files, history and cookies) via the Internet options menu in Internet Explorer.**

PIN-code: 1001

Phone number for log-in in the Personal area: +7(911) 111 11 11

Password log-in in the Personal area: Qwe1234\$

SMS-code: 1234

## Start the demo stand

To start the demo stand, please open [this link](#) in Internet Explorer. **Before starting the demo stand, please clean the browser's cache (delete temporary files, history and cookies) via the Internet options menu in Internet Explorer.**

## Errors in starting the demo stand

1. If you cannot log in a personal area, make a payment or any other operation, please clean the browser's cache (delete temporary files, history and cookies) via the Internet options menu in Internet Explorer and re-start the demo-stand. If this does not work, please contact technical support at [http://digitalbankplatform.com/log\\_in](http://digitalbankplatform.com/log_in)
2. To input the client's information (login, password, payments details) please use the ATM keyboard emulator on the screen, in the top right corner.
3. When you log in a personal area please pay attention on password Qwe1234\$ - the first letter is uppercase and the next ones are lowercase letters.

4. After starting the demo stand you access the working area:

If the ATM emulator display does not fit your screen please zoom it in or out it with <CTRL> + mouse wheel, or by pressing <Control> + <-> or <Control> + <+>.
